

Genesis

Description

Designed as a sculptural composition rather than a collection of separate pieces, the Genesis modular sofa brings a sense of calm and continuity to contemporary living spaces. Its signature curved silhouette flows seamlessly from the armrests into the backrest, creating a soft, cohesive form without hard edges or visual clutter. Available in different configurations it can be tailored to different room layouts and seating needs.

The structure combines multilayer panels, chipboard, and solid fir wood, with an elastic strap suspension for supportive comfort. The seat is padded with double-density expanded polyurethane foam and polyester fiber, while the backrest combines expanded polyurethane foam and polyester fiber. Non-removable upholstery is available in fabric or leather with matching piping, complemented by a Wenge-tinted beech wood base. A metal arch logo on the front left side of each composition adds a distinctive finishing touch.

With its low-profile presence, organic curves, and versatile modular design, the Genesis modular sofa makes a sophisticated statement in modern living rooms and spacious lounge areas.
Made in Italy.
