

Samet

Design: Federica Biasi

Description

Samet Sectional combines soft, harmonious geometries with exceptional materiality. Its plywood and solid wood structure, supported by elastic belts and high-resilience, variable-density polyurethane foam, ensures lasting comfort, while the heat-bonded fiber covering adds softness and refinement. Generously proportioned polyurethane back cushions complete the inviting silhouette, while black polyethylene feet provide a discreet foundation. Finished with a removable cover and elegant quilting, Samet is a refined expression of craftsmanship, flexibility, and timeless comfort. Made in Italy.
