

Cuadra-soft Edge Sectional

Design: Patricia Urquiola

Description

Reimagining modular lounge seating through the tactile artistry of haute couture, Cuadra-Soft Edge introduces a subtle yet significant variation on contemporary architectural furniture. The profile, traditionally the site of structural transitions, is reinterpreted with a plush fur fabric trim rendered tone-on-tone with the primary upholstery. This haute tailoring detail softens the sharpness of the edge and returns it as visual comfort while preserving the piece's strong architectural silhouette

Constructed for exceptional structural integrity and sustainable comfort, the sectional is built around a powder-coated tubular steel frame supported by elastic webbing. The seating cushions utilize flexible polyurethane foam with differentiated densities combined with recycled polyester fiber padding. Grounded by varnished solid ash or lacquered beech feet, the modular elements link together seamlessly to create custom, low-slung arrangements for high-end residential and luxury contract interiors.
