

Graal Extendable

Design: Andrea Casati

Description

The Graal Extendable Dining Table is engineered with a patented lateral extension system integrated into the table's metal track. The mechanism allows the side extensions to be pulled outward smoothly, increasing the tabletop by an additional 31 1/2 inches and creating a larger surface for dining and entertaining.

The tabletop and extensions are available in glass or ceramic, combining a refined appearance with durable, easy-to-maintain surfaces. The structural base and extension track are offered in chromed or painted metal finishes, providing stability while complementing the overall contemporary design. The straightforward patented mechanism makes extending and closing the table intuitive, while ensuring the extensions remain properly aligned with the main tabletop in both configurations. Made in Italy.
