

Korus Extendable

Design: Andrea Casati

Description

The Korus Extendable Dining Table features a patented lateral extension mechanism designed to provide smooth and intuitive operation. The side extensions pull outward along the integrated painted metal track, allowing the tabletop to widen while maintaining proper alignment between the central top and extensions.

The tabletop and lateral extensions are available in glass or ceramic, while the structural base and extension track are made from painted metal. The engineered opening system combines ease of use with a stable, precisely coordinated structure, allowing Korus to transition efficiently between its compact and extended configurations. Made in Italy.
