

Valmont Extendable

Design: Andrea Casati

Description

The Valmont Extendable Dining Table is engineered with a patented lateral extension mechanism integrated into the painted metal track. The side extensions pull outward to widen the tabletop by an additional 31"1/2 inches, providing a smooth and intuitive transition between the compact and extended configurations. The tabletop and extensions are available in glass or ceramic, while the structural base and extension track are finished in painted metal. The integrated mechanism is designed for easy operation and precise positioning of the lateral extensions, maintaining a clean, aligned appearance when the table is fully extended. Made in Italy.
