

Marvin Bed

Design: Carlesi Design

Description

The Marvin bed reinterprets the concept of maximum comfort through a visionary, modern approach. Conceived around the idea of a structure as soft and enveloping as a cloud, its generous silhouette features a modern capitonné effect crafted using Lycra, an unusual material for the furniture sector, woven to create a rich material texture.

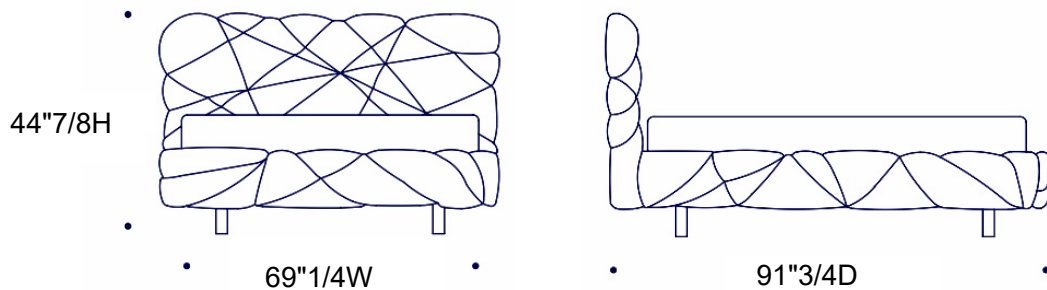

The internal construction utilizes an unevenly perforated wooden panel engineered to anchor strong structural threading, outlining soft geometric swellings across the headboard and frame. The result is a bold, original archetype that offers extraordinary tactile softness and long-lasting ergonomic support, adapting harmoniously to both prestigious contemporary environments and classic luxury interior design projects.
