

Arco Coffee Table

By Apospersano for PRIMAR

Description

The Contemporary Arco Coffee Table interprets architectural form through a geometric composition of overlapping natural stone volumes. Its sculptural profile emphasizes proportion, surface, and material, creating a strong yet refined presence. The solidity of the stone is complemented by brass detailing, introducing a sophisticated contrast between natural and metallic elements. With its clean geometry and carefully balanced materials, the Arco expresses a contemporary approach centered on simplicity, elegance, and craftsmanship. Made in Italy.
