

Boundary Table

By Marco Piva for PRIMAR

Description

The Contemporary Boundary Table is an elliptical long table designed by Marco Piva, defined by the meeting of two natural stones arranged along a diagonal line. This contrasting material composition gives the tabletop its distinctive identity while emphasizing the relationship between color, texture, and geometry. The stone elements are supported by an iron base connected to eight acid-treated iron legs, creating a solid and carefully structured foundation. Boundary brings together material contrast, precise geometry, and a strong architectural presence in a refined contemporary design. Made in Italy.

Finishes & Materials

Top Half A: Stone

Top Half B: Stone

Legs: Metal
