

Centro 72 Table

By Gumdesign for PRIMAR

Description

The Contemporary Centro 72 Table is part of the Centro collection, which includes tables, coffee tables, and stools defined by a precise relationship between geometry and material. The contrast between the central support and tabletop is shaped by inclined, opposing diagonal lines, giving the piece a dynamic yet carefully balanced presence. Crafted from natural stone with a honed finish, the Centro 72 can be presented in different color configurations and combinations across the collection. Its sculptural form, clean proportions, and material richness give the table a versatile contemporary character. Made in Italy.
