

Fuente Console

By Aretai for PRIMAR

Description

The Contemporary Fuente Console is part of the Fuente collection designed by Aretai, defined by elliptical shapes and essential volumes sculpted from natural stone. Its elongated top rests on two semicircular stone supports, creating a harmonious relationship between geometry, proportion, and material. With its clean lines and sculptural construction, the Fuente Console highlights the natural character and timeless quality of stone through a contemporary design language. The result is a refined architectural piece that brings balance, material richness, and a strong visual presence to the interior. Made in Italy.
