

Messapo Lounge Chair

By Noii Studio for PRIMAR

Description

The Contemporary Messapo Lounge Chair belongs to a modular collection that reinterprets the traditional dry-stone walls found throughout the rural landscape of Salento. Designed for both indoor and outdoor settings, the chair is composed of two elements that can be assembled, disassembled, and rotated to create different arrangements. This modular approach encourages a more personal use of space, allowing the seating to adapt to changing layouts and environments. The result is a contemporary lounge chair that brings together functionality, architectural inspiration, and creative flexibility. Made in Italy.
