

Piro Coffee Table

By Lucidi & Pevere for PRIMAR

Description

The Contemporary Piro Coffee Table, designed by Lucidi & Pevere, brings together natural stone and metal in a compact sculptural composition. The stone element is turned to create a monolithic, substantial form, while the metal structure introduces a lighter visual contrast and a more dynamic character. Designed for both indoor and outdoor environments, Piro uses material, proportion, and simplicity to create a distinctive contemporary presence. The result is a versatile piece that combines solidity, balance, and understated architectural appeal. Made in Italy.
