

Traza Console

By Ramon Esteve for PRIMAR

Description

The Contemporary Traza Console is defined by a monolithic silhouette and a rigorous geometric composition. Its sculpted volume emphasizes the solidity of natural stone, while the textured front recalls the raw character of freshly extracted material. The contrast between smooth surfaces and the rougher stone texture gives the console a distinctive architectural presence. With its clean lines, material depth, and restrained composition, Traza brings a refined contemporary character to the interior. Made in Italy.

Finishes & Materials

General Structure: Stone
