Brenta

Description

The Bora Lounge Chair is designed for those seeking maximum relaxation combined with a sophisticated aesthetic. Equipped with a motorized mechanism that allows for the simultaneous movement of the backrest and legrest, it is operated with a simple control on the side of the armchair, complete with a USB port.

The non-deformable, padded polyurethane padding ensures a comfortable and stable seat, while the upholstery, available in leather or fabric, elegantly adapts to a variety of furnishing styles. The design is complemented by a solid black metal base and a height- and tilt-adjustable headrest for personalized comfort. The Bora is also available with a rechargeable battery kit for maximum flexibility.

Finishes & Materials

Structure: Wooden frame fitted and metal with and elasticized webbing suspension, covered with stress resistant undeformable polyurethane foam.
Paddings: Polyurethane foam and padding.
Covering: In leather, or in fabric not removable.

Specifications

Electric Reclining Mechanism

The electric reclining mechanism allows you to adjust the backrest, seat position, and footrest at the touch of a button. Featuring a Zero Wall system, the sofa can fully recline without needing to be moved away from the wall. The mechanism operates through a power connection to a standard wall outlet.

Optional Battery Kit for Recliner

An optional rechargeable Battery Kit for Recliner is available for purchase separately, allowing the electric reclining mechanism to operate wirelessly without requiring a permanent connection to a wall outlet. This provides greater flexibility in sofa placement while keeping power cables out of sight.
