Mettitutto

Design: Stefano Boeri Architetti

Description

Mettitutto Storage Unit reinterprets the traditional Italian sideboard through an innovative and versatile design, conceived to elegantly accommodate the many personal accessories we carry with us every day. Designed for the home, it features a sophisticated arrangement of rotating containers and an open shelving unit accessible from both sides, combining drawers, shelves and storage compartments in a refined interplay of wood, glass and leather.

The composition includes twelve functional elements, featuring double-sided drawers, practical containers and carefully integrated metal accessories. LED lighting, discreetly incorporated within the wooden shell at shelf level, enhances the interior, while a built-in USB port adds a touch of modern convenience. A distinctive fusion of Italian design, intelligent organization and refined craftsmanship. Made in Italy.
