

Athena

Design: Mauro Lipparini

Description

The three-dimensional lightness of the legs, made of metal wire, contrasts with the structure of the seat back, in order to create a harmonious effect of balance between shape and volume. The slightly curved seat back is gathered and envelops the seat padding to give ergonomic and dynamic comfort. The chair has a structure of wood and legs in metal in the following finishes: micaceous brown, titanium or brass. The seat and back are covered in the fabric or leather from the collection.

Finishes and materials

Structure: Wood.

Feet: Metal, finishes: micaceous brown, titanium or brass.

Attention: The following fabrics are not recommended: Camisia; Patsy. C.O.L. max thickness 0" 1/2.
