

Iride

Design: Bernhardt & Vella

Description

Iride is a sculpture made of lines and circles, with a geometric shape of strong decorative impact that reminds you of Kandinsky's works. The disc creates a luminous halo similar to several eclipses. The intertwining structure is made from three discs and three bars in micaceous brown metal and one disc and bar in titanium finish.

Finishes and materials

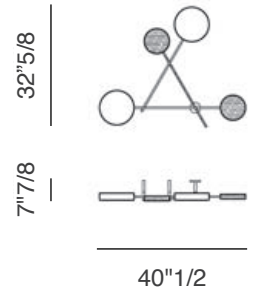

Structure: Metal, finishes micaceous brown and titanium.

Drawn metal: Metal discs, finishes in micaceous brown and titanium (indicated in grey in the picture). LED lighting with dimmer switch.
