Design: Dante O. Benini & Luca Gonzo

Description

Executive desk with structure in Canaletto walnut and top in marble or Canaletto walnut. The top is supported by a metal structure composed of 158 cylinders in three different sizes and finishes. Two cylinders placed at the end of the sub-panel act as cable grommets. The cables depart from a technical compartment placed in the structure, illuminated by LEDs with an opening sensor and equipped with 3 schuko sockets and 2 RJ45 sockets, to exit through a conical hole carved from solid Canaletto walnut. The leather-covered desk pad, in the same color as the lower top, presents two USB A/C multi-sockets integrated into the structure with a matt black sheet.

The left-hand unit consists of a single compartment with LED lighting with opening sensor and multi-socket (3 schuko sockets and 2 RJ45 sockets). The right-hand chest features three drawers of different sizes, with leather bottom, in the same color as the top insert and the desk pad.

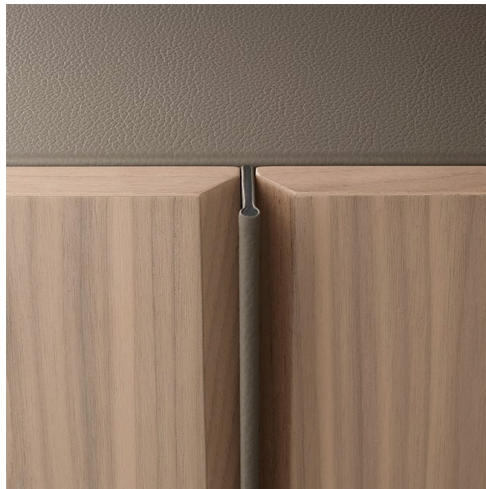

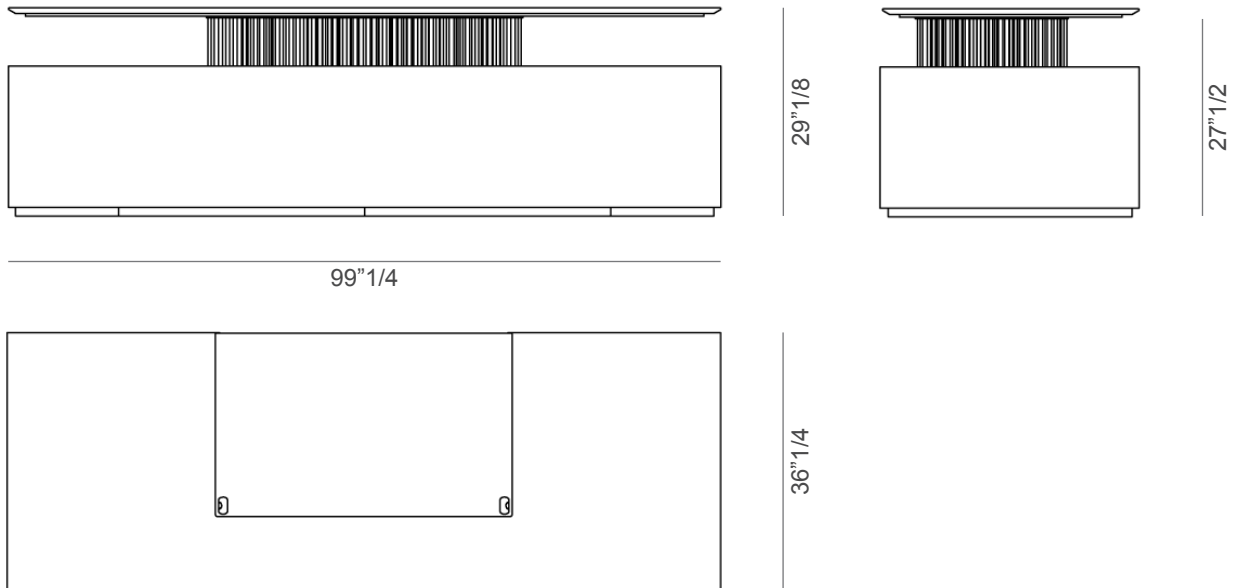

Metal handles covered in leather and inserted in the front of the drawers. Courtesy compartment for guests in the front, illuminated with a dimmable LED strip with remote control supplied. Height-adjustable feet. It is possible to add an app-controlled automatic closing system to the left-hand and drawer unit and the bottom right-hand drawer. Made in Italy.
